GREENWAY GUARDIANS

Save the CROSS FLORIDA GREENWAY

Stop DUKE ENERGY

Duke has plans to clear-cut a 100-foot-wide swath through the Greenway from SR-484 to I-75 where they will place large steel towers connecting high voltage (230-kilovolt) transmission lines. The blue circle on the map indicates the portion of the Greenway that is threatened.

OUR GOAL

There are existing utility/transportation routes that Duke can use that do not require destroying large sections of the Greenway.
The goal of the Greenway Guardians is to persuade Duke to choose one of these routes.

HOW YOU CAN HELP

Join the Greenway Guardians Facebook group for more information and to connect with your concerned neighbors.
